

YCANTH® Patient Treatment Guide

STEP 1: Call YcanthRx to fill your YCANTH Prescription

 After your appointment, please call YcanthRx at (855) 403-2364 to fill your prescription as ordered by your provider.

During the call, YcanthRx will:

- Verify your insurance coverage and confirm your next appointment.
- Help you save on the cost of your medication with the YCANTH Copay Program. With the Program, commercially insured patients can pay just \$25 per YCANTH treatment visit.* Eligibility requirements apply.

 YCANTH will be shipped directly to your doctor's office for your next treatment.

STEP 2: Follow-up Appointments

Please note: Most patients require more than one treatment to completely clear their bumps. You or your child remain contagious until all bumps are clear.

Contact YcanthRx to process your prescription for each visit.

What To Do After Treatment

Wash all treatment sites 24 hours after treatment with a gentle soap and water. Avoid washcloths or abrasive surfaces. You may wash YCANTH off of your skin sooner if directed by your healthcare provider, or if severe application site reactions occur.

Avoid creams, lotions, oils, and sunscreen on the treated skin. These products should not be applied for 24 hours or until after washing the affected and treated skin.

If discomfort occurs, over-the-counter medicine such as acetaminophen or ibuprofen can be taken as needed. Local skin reactions are expected and should be reported if they are severe.

To report SUSPECTED ADVERSE REACTIONS, contact Verrica Pharmaceuticals Inc. at 1-877-837-7422 or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

Blistering is a sign that YCANTH is working to help clear the bumps from your skin.

These images represent some of the lesions of a YCANTH-treated patient in a phase 3 study—individual results may vary.

What to Expect Post Treatment:

After treatment:

If you experience discomfort, use an over-the-counter pain medication. Blisters form within 24 to 72 hours.

The next few days:

Avoid squeezing, “popping,” or scratching any blisters, as they could become infected.

Seven to 14 days after treatment:

If scabs form at the treatment sites, try to avoid picking or scratching—removing the scab can increase the risk of scarring.

Blistering is a sign that YCANTH is working to help clear the bumps from your skin.

YCANTH Patient Guide

*Program is solely for patient's charges incurred in the use of YCANTH (cantharidin) topical solution and does not include any other related charges. The Program is only for qualified commercially insured patients who have been prescribed YCANTH consistent with the prescribing information. For all qualified patients, Verrica is responsible for all YCANTH product costs under the Program amount and excluding the copay requirement. Your insurance provider can provide the most accurate explanation of all charges. Approval to the Program is not guaranteed. Program has a lifetime maximum benefit (see [ycanth.com/cost-savings](https://www.ycanth.com/cost-savings) for details). Until the patient reaches the maximum Program benefit, providing healthcare professionals may not charge the patient more than the applicable Program allowance. Patient will bear financial responsibility for all costs not covered by commercial insurance exceeding maximum benefit for YCANTH. THIS IS NOT INSURANCE. Not valid for prescriptions paid, in whole or in part, by Medicaid, Medicare, VA, DOD, TRICARE®, or other federal or state programs including any state pharmaceutical assistance programs. This Program is not valid where prohibited by law, taxed or restricted. Verrica reserves the right to rescind, revoke, terminate, or amend this offer, eligibility, and terms of use at any time without notice. Additional terms and conditions may apply.

TRICARE® is a registered trademark of the Department of Defense (DOD), DHA.
